From the Principal

Dear Parents, Caregivers, Staff and Students

Principal 2011
It is with pleasure that I extend congratulations to Mark Leahy who has been re-appointed as Principal of Marryatville High School for the next 7 years, beginning in January 2011. Mark brings to this position clear understanding of the school and community needs.

Future Problem Solving
Congratulations to the Middle Years Future Problem Solving team who were invited to Melbourne to attend the national finals. Only the top 10% of teams entering this competition are invited to attend. The team competed against 34 other teams from across Australia. Jenni Henzell, a retired teacher from Marryatville High School, has been working with these students. Although they were not placed in the top six, the team acquitted themselves very well.

At this meeting Jenni Henzell was awarded life membership of the National Future Problem Solving Association for her dedication to this event.

Open Governing Council Meeting
2011 Materials and Services Charges will be considered for endorsement at a meeting on Tuesday 16th November at 6.30pm. A letter was given to all students on Wednesday 27th October with details of this meeting.

Annual General Meeting of the Governing Council
A reminder that the Annual General Meeting of the Governing Council will be held on Tuesday 23rd November 2010 at 7.30pm in the Stables. Please consider nominating for one of the seven parent positions becoming vacant.

Mind Matters Recognition
On Thursday November 4th, Julie Ferguson, Assistant Principal and Catherine Litchfield (Year 9 student) were flown to Canberra to participate in a recognition ceremony and lunch. They had to prepare a display showing how the school has used Mind Matters material and tools to promote Staff and Student Wellbeing.

Research Project
Last week 15 staff were involved, over two days, in extensive preparation for the introduction of the Research Project at Stage 2 in 2011. Thank you to the SACE Board, Future SACE, and DECS personnel for their leadership during this time.

Twilight Concert and Art Exhibition
All families and friends of Marryatville High School are invited to attend our Art Exhibition and Twilight Concert on Friday 19th November from 5.30pm. The official opening of the Art Exhibition is at 7.00pm in The Forge. This is a wonderful night of music from our students and a chance to have a picnic tea or a bbq.

Kerry Friedrichs
PRINCIPAL

The School Mathematics Competition (SMC) is organised by the Mathematical Association of South Australia (MASA) and sponsored by the Society of Petroleum Engineers (SPE).

SEE PAGE 2
The School Mathematics Competition (SMC) is organised by the Mathematical Association of South Australia (MASA) and sponsored by the Society of Petroleum Engineers (SPE).

The Competition has three divisions: Junior (up to Year 8), Intermediate (Years 9, 10) and Senior (Years 11, 12, 13), of which Marryatville High School had 27 students, spread evenly across 3 divisions.

The aim of the competition is to encourage interest and motivation in students to enjoy the challenge of non-standard problems. While some of the questions require extended knowledge and responses, the paper(s) aim to give a wide range of students the opportunity to achieve some success.

Prior to the competition, which was held on Tuesday 16 March workshops were held and attended by several Marryatville High School students, to assist in the preparation for the competition.

All students achieved some success and valuable experience by participating in the competition.

Mr D. Robertson

MATHEMATICS QUIZ NIGHT

Congratulations to David Wong, Sarah Lim, Taek Hyun (Louis) Kwon and Hang Sung Kim who won prizes in the annual Mathematical Quiz Night which was held at Prince Alfred College in August.

Other competitors from our school were Sebastian Stead, Ki Yoon Kim, Sian Hay, Jialun Qi and Jung-hee Han, Xin (Kasol) Liu, Hoi Lam (Alyssa) Yau, Xiaohiu (Katrina) Zhou for the Senior Division and Matthew Roylance, Sarah Nicholls and Cameron Mayfield in the Junior Section.

The Mathematics Quiz Night is a popular and enjoyable event where students compete with teams from other schools in the areas of General Knowledge and Mathematics. All our students performed well, displaying excellent skills in teamwork, problem solving and lateral thinking.

R Fotheringham
Ex-Student Does Well in Mathematics

Our best wishes and congratulations go to ex-student Nicolas Ivancevic who, at the age of 18, has graduated from the University of Adelaide with a Bachelor of Mathematical and Computer Sciences.

Nicolas came to Marryatville High School as a Year 8 student in 2004. Because of his exceptional skills, he was accelerated in Mathematics and started University as a part time student in 2008 at the age of 15. He completed his undergraduate degree after only 2 years of full time study, obtaining a Dean’s Meni Certificate for Outstanding Academic Achievement.

This year, while still 18, Nicholas was offered a full time scholarship at the University of Adelaide to study for a Master of Philosophy with the department of Theoretical Physics. He plans to finish this next year.

We wish to acknowledge Nicolas’ remarkable achievements and wish him every success in his future endeavours.

The Australian Mathematics Competition

In August, 74 students from across Marryatville High School sat the Australian Mathematics Competition for the Westpac Awards.

Sponsored by Westpac Banking Corporation, this is the original and largest of its kind in the world. The competition consists of intriguing problems which students can enjoy solving.

While congratulations must be extended to all who participated, special mention must be made of some particularly outstanding results.

One Year 8 student won a prize, placing them within the top 0.3% of the State in their age group: David Wu. This student has been invited to a special ceremony in the Adelaide Wine Centre where his prize will be officially presented.

A Prudence Award was won by another Year 8 student; Jihyung Lee, for the highest number of consecutive correct answers in the school.

In addition, 3 students were awarded High Distinctions for achieving results within the top 2% of the State:

Year 8: Nicholas Johnson,
Year 12: Xin Liu and Jialun Qi

A further 20 students gained a Distinction for results in the top 15% of South Australia:

Year 8: Keith Doddridge,
Naomi Belet, Nhi Thii Thien Mai,
Daniel Webber,
Year 9: Louis Kwon, Youjung Lee,
An Nguyen, Joshua Kong, David Wong, Emmatien Tran, Matthew Roylance,
Year 10: Fuwen Zheng,
William Boult, John Howie,
Heeji Nam,
Year 11: Brandon Hua

Altogether, the performance of our students within the State was exceptional. Many thanks to all who participated. The high number of Year 8 participants and their exceptional results should ensure that Marryatville High School will continue to excel in this competition in years to come.

Mrs H Hay, competition co-ordinator
On the 22nd of September, a group of 15 students from Ms. Madden’s class were taken to Adelaide University for the “Maths-Science Life Impact Program”.

We started out with an introduction from a couple of lecturers about the impact of Maths and Science in everyday life and how it would help us in the future with our studies. They explained what courses were available if a student decided to study Maths and Science and talked about what programs were available at the University. We then got split up into groups and moved on to different areas of the University.

My group went to a Biology laboratory first. There a lecturer talked to us about micro-organisms and how they are all around us. Eventually we looked at some bacteria commonly found in water and on surfaces around us. The students moved around and looked at samples of bacteria under the microscopes. After about an hour of viewing different types of bacteria we moved on and had a break, where we were given some snacks. After about half an hour, we went to a Chemistry laboratory where we made biodiesel. It took quite a bit of time as we had to heat it then rest it then heat it again and then let the biodiesel filter through paper into a test tube. When we lit the biodiesel we got a clean fire going. After we finished this it was time to go home.

It was a great experience as the students all got to know the uses of learning Maths and Science and possibly having a career in either area. We learnt many things about the standard of study at University and how doing well in school will help us with our lives. Essentially, it was – as I said before – a great experience.

Ruchira Fonseka (9.1)
CSIRO Nanotechnology Workshop

In Week 7 of Term 3, the Year 10s welcomed Nikki from the CSIRO (Australian Commonwealth Scientific and Industrial Research Organisation) into our school to run a workshop with us on Nanotechnology; a topic which until then was, to most of us, in league with ideas of the sci-fi genre. The program was created to ‘raise our awareness and understanding of the contemporary issue of Nanotechnology’.

Nanotechnology is a science related to nano-particles, particles so small they may contain only tens of atoms. Nanotechnology is the application of these nano-sized objects and materials in useful ways through their manipulation.

The Nanotech workshop took a very hands-on and down-to-earth approach, enabling us to experience for ourselves a handful of the vast number of beneficial uses towards which this modern science has been directed. It also stimulated us to explore potential future uses.

The Science Lab was segregated into a series of work stations. At each work station was setup an experiment involving one current form of Nanotechnology. We began however, with a charismatic introduction to the subject. A volunteer from amongst us was asked to stand before the class and button on a shirt, a shirt which we were told was the product of fibres treated with a nano-coating. Our volunteer trustingly allowed a cup of water to be poured into the shirt’s top pocket. Amazingly the nano-fibres prevented the water from soaking through the shirt, to such a degree in fact that she was then able to tip the water straight back into the cup. Following this demonstration we brainstormed possible applications and benefits of treated clothing, from making the clothes easy to clean, to use as defensive armour.

Following this the class engaged in the tasks laid out around the laboratory. Each experiment we encountered was designed to prove to us, through self investigation, the viability of different applications for nanotechnology. Amongst the nine experiments the one which most would say appealed to them visually was the Ferrofluid. Ferrofluids are essentially liquids with the magnetic properties of a solid: a magnetic liquid. This had the most surrealistic affect of all the applications presented to us, as it allowed us to control the mysterious fluid with a magnet, creating spikes on the liquid’s surface as the magnet approached. Ferrofluid was first discovered by NASA as part of an investigation into the possibility of controlling liquids in space.

The most practical of the nanotech experiments was found in the LIFESAVER bottle. This is a water filtration system which has been fitted to the form of a large water bottle. We were able to fill the bottle from a bucket of stagnant water full of bacteria and dirt. Then, proceeding to pump the base of the bottle, we witnessed the purified, drinkable water emitted from the top. The potential uses of water filtration as a precautionary measure for hikers (in the case of the LIFESAVER bottle) and on a grander scale as a means to provide clean drinking water to people in third-world countries, was easily recognised by all the year 10s. The one draw back we were told was that the nano-filtration system could not filter saltwater.

The workshop was thoroughly engaging and gave all of us in years 10 a much clearer view on what nanotechnology really is. If you are interested in the applications of nano-science, in particular the LIFESAVER bottle, you can visit www.ted.com to watch a short and fascinating presentation by the creator of the LIFESAVER bottle, as well as many other interesting videos well presented by experts in various topics.

By Griff Perkins
Music News

The year 12 exams are well under way and the year 11s will soon face theirs.

The next few weeks will also see a crescendo of activity in the SIMC in preparation of our final concerts and events.

The New Music Concert is an excellent opportunity to experience students’ own compositions being performed. A range of pieces have been chosen to highlight the work done by students this year both in class and for their own edification.

The Twilight Concert is always a favourite with our community. A pleasurable event with students performing in all of our large ensembles al fresco. Food and beverages will be available for purchase, and you are encouraged to bring a blanket or chairs for comfort. During the evening the School’s Art Exhibition will also be unveiled and open for viewing in The Forge.

The Junior Concert in Elder Hall highlights our Junior Ensembles and also our classroom choirs. Our students, including senior students, are recognised for their participation and leadership in extra curricular concerts with medallions and certificates.

The Christmas Choral Concert is a week earlier this year so that it is clear of activities week.

Come and listen to festive music and songs, but also participate in some community singing. A joyous celebration to end the year.

Coming Events

November 10th (Wed) – W5
6:00 – 9:00pm
New Music Concert – The Stables
Selected students performing their own new work

November 19th (Fri) – W6
5:30 – 9:30pm
Twilight Concert – The Flat
Junior Orchestra, Junior Band, Studio Strings, Senior Band, Chamber Orchestra, Percussion Ensemble

November 22nd (Mon)
6:00pm
Guitar Concert – The Stables
Marryatville High School Special Interest Music Centre

November 25th (Thur) – W7
7:00 – 9:30
Junior Concert – Elder Hall
Year 8 and 9 Class choirs, Junior Band, Studio Strings, Junior Orchestra, Junior Guitar Ensemble

December 1st (Wed) – W8
7:00 – 9:30pm
Christmas Choral Concert – The Forge
Extra curricular vocal ensembles

December 5th (Sun) – W8
6:30 – 9:30
Bamside Carols – Hazelwood Park
Junior Choir, Concert Choir
Out and about

Our former students have again been spotted on the stages around Adelaide. Natalie Tate and Riley Sutton were both in the Elder Conservatorium’s recent production of Into the Woods. Both performed their roles with animation and charisma, singing with both confidence and nuance.

On October 30th, the Adelaide Chamber Singers celebrated 25 years of existence with a concert at St Peters Cathedral. A highlight of the program were two 40 part works, one by Gabriel Jackson and the other by Thomas Tallis. Of the 40 singers involved one quarter were once Special Interest Music students at Marryatville: 8 were recent graduates (Jonathan Bligh, Robin Parkin, Andrew Barley, Thomas Giam, Tim Wilson, Karl Geiger, Edward Joyner, three were slightly older (Christie Anderson, Lee Thompson, Gemma Munro) and one was the Head of Music. The concert was well received by the audience with a standing ovation at the end.
Exchange to Warabi High School, Saitama, Japan

I am studying on a scholarship for three months at Warabi High School, Saitama, Japan. I am currently about one month into my time here. School in Japan is very different from school in Australia. We have five lessons every day and each lesson goes for 65 minutes. We have a 45 minute lunch break after lesson three. When school finishes at 3:40pm we clean the classroom and the school yard. Then we go to a club activity. Club normally finishes at about 6 o’clock and after that I ride home. I go to school by bicycle. It is a half an hour ride each way. At Marryatville High School we have many exchange students. At Warabi I am one of four. I certainly stand out! But everyone is very helpful and friendly. My host family is very kind. They don’t speak a lot of English which means I practice my Japanese a lot. I also have to use Japanese with teachers at school because they don’t speak English. At least I get a lot of practice!

Sophie Thorpe, Year 10
The SRC for 2010 has now officially concluded.

It has been an energetic and constructive year, and I must thank and congratulate every single member for putting in all the efforts that you have in making it so successful.

As a celebration of such a great year, the SRC attended a dinner and were invited to attend the Year 12 Presentation night on Monday the 25th of October. It was a great evening and I think I can say that everyone who attended enjoyed themselves thoroughly.

On behalf of the SRC, I would like to wish all the best to the year 12s in finishing this year and to all those currently sitting end of year exams. We must also acknowledge the exceptional efforts of the 2010 Year 12 SRC members, in particular Jacqui Carias and Young Nang Jung who have both contributed outstandingly over the course of this year.

On a personal note, I would like to remark on how rewarding my experience as SRC school captain has been this year and how much I have enjoyed working with such a great team of people. My thanks again go out to every SRC member for their outstanding contributions as well as to those students who helped out the SRC, especially leading up to Big Day In. I must also thank Mr. Heard for all his help as the SRC staff manager, Mr. Leahy and Ms. Friedrichs as such supporting Principals, as well as Ms. Ferguson, Mr. Blue, Ms. Bashford, Ms. Casey, Ms. Johnson, Ms. Borelli and Ms. Fereday and Ms. Annicchiarico in the Finance Office. Thank you also to all the other staff who have contributed to the success of the SRC this year.

I encourage all interested students to nominate for the coming SRC elections for next year. I can promise you it will be a fun and rewarding experience and I’m sure you will get a lot out of it.

Brenna Mackay

Zoosnooze: camp 1
27- 28/10/10

Day 1 of Zoosnooze was exciting because we were able to wander around the zoo on our own, touch some of the animals and at night we got to see the animals were going to bed. My favourite animals where the lions, tigers, sun bears, siamangs, orangutans, meerkats, tamarins, peacocks and the snakes.

Day 2 was fun because we got to see the animals wake up. The siamangs especially were very cool because they usually jump around remarking their territory. I liked the tamarins and siamangs because they were the most active animals in the zoo.

David Johnson 8.1
The Premier’s Reading Challenge For 2010

TO: THE PRINCIPAL, STUDENTS
AND MEMBERS OF THE SCHOOL COMMUNITY

RE: PREMIER’S READING CHALLENGE

Congratulations on another wonderful year of reading.

I hope you feel very proud of your achievement in the 2010 Premier’s Reading Challenge as the certificates and medals are awarded and you celebrate the occasion.

You have helped to make this another successful year, with 97 per cent of all schools in South Australia involved and well over 110,000 students completing the Challenge.

The Premier’s Reading Challenge is now in its seventh year and more than 7,000 students will be receiving the very first Hall of Fame medals. These students started the Challenge in 2004 and have completed the Challenge every year since it began.

To recognise this fantastic achievement, all students receiving the Hall of Fame medal have the opportunity for their name to be included in the new Hall of Fame Honour Roll.

From 2011, the new Hall of Fame Reader for Life award will be presented to all students who complete the Challenge for eight years or more. The award is a gold embossed certificate which will be personalised with each student’s name and the number of years they have completed the Challenge.

The Government of South Australia is delighted to support the Premier’s Reading Challenge, but it is students, staff and parents who make it a reality and I thank you all for your efforts. In particular, I thank the school contact people and a small gift of a Premier’s Reading Challenge certificate is enclosed.

Being able to read well is such an important step in developing good literacy skills. It is the key to success at school and in student’s future career options.

I encourage all students to take up the Challenge again next year and to continue on the journey of becoming a reader for life.

Warmest regards

MIKE RANN
Premier

October 2010

Marie Bury
TEACHER LIBRARIAN

Congratulations to the 21 students of Marryatville High School who participated in the Challenge this year.

4 avid readers have been the first students from this school to join “The Hall of Fame” and their names will go on to the new Hall of Fame Honour Roll. They have successfully taken part in the Challenge for 7 years in succession, working their way from Certificate through to Bronze, Silver, Gold, Champion and Legend to this year’s crowning glory, the new award, The Hall of Fame. The awards for the 17 students range through from first timers acquiring the Certificate to the sixth year award, the Legend Medal. Well done all of you and good luck next year as you continue reading.

Booklists will be distributed to students during week 5 of this term (beginning 8 November 2010). Books can be ordered online, by mail or by visiting Wooldridges, Magill store which is located at 557 Magill Road, Magill.

For further information please go to the website www.wooldridges.com.au (order code is ZZYS060)
Absentees, Late Arrivals, Early Leavers

For absentees call Penny Borrelli in Student Services on 8304 8426.

For late arrivals from 8:30am, students need to sign in at the Focus Room or at Student Services. They are expected to have a note for their home group teacher the next day. Students who need to leave early need to sign out through Student Services. Please contact Penny Borrelli at Student Services if you have messages about students arriving late or needing to leave early.

Parents & Friends Next meeting

The next event coming up is the Twilight concert. It is on November 19th and P&F will be providing cheese plates on the night. If you would like to donate any sweets (Cakes or slices etc) we would be extremely grateful & they can be left at student services on the day.

Many thanks for your continued help.
